Mattia Strangi: 0039 393211984
e-mail: mattia.strangi@unibo.it
e-mail: andrea.simone@unibo.it

Technical visit program

The guided tour conducted in English will be divided into two parts. The first part will be theoretical, featuring videos of road accidents and an analysis of the drivers' mistakes, along with how these incidents could have been prevented. The second part will be practical, allowing participants to apply what they've learned through the use of software and equipment designed to demonstrate how distractions affect driving behavior and how even minor impacts can have consequences on the human body. The visit will conclude with an interactive questionnaire on a touchscreen computer, in which all students will participate.
